

SIVANANTHAN M

VAPT Analyst | Cybersecurity & Risk Consulting Professional

Dharmapuri, TN | sivananthan46m@gmail.com | +91 8838727492 | [Linkedin.com/in/sivananthanm](#) | [Github.com/MSivananthan](#)

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on **Vulnerability Assessment and Penetration Testing (VAPT)** exposure across web applications, networks, and infrastructure, combined with production SOC and SIEM experience at **PwC (Risk Consulting & Advisory)**. Practical experience using **Nmap, Burp Suite, OWASP ZAP, Nessus/Qualys, and Wireshark** for vulnerability scanning, manual validation, and traffic analysis, with working knowledge of **OWASP Top 10**, TCP/IP networking, HTTP/HTTPS, DNS, VPN, and firewalls.

Certified Ethical Hacker (CEH) with additional Microsoft certifications in Security Operations (SC-200) and Azure Security (AZ-500). Comfortable scripting in **Python, Bash, and PowerShell** to support security tasks. Experienced in SIEM engineering (IBM QRadar, Palo Alto Cortex XSIAM, Google SecOps, Wazuh), log analysis, and digital forensic investigation, with a track record of **multiple client appreciations** for delivery quality and collaboration.

TECHNICAL SKILLS

VAPT & Security Tools: Nmap, Burp Suite, OWASP ZAP, Nessus, Qualys, Wireshark

Security Concepts: VAPT methodology, OWASP Top 10, vulnerability assessment, manual validation, risk rating, remediation recommendations

Networking Fundamentals: TCP/IP, HTTP/HTTPS, DNS, VPN, Firewalls, Network Traffic Analysis

SIEM & SOC: IBM QRadar, Palo Alto Cortex XSIAM, Google SecOps, Wazuh, Suricata, SOC L1 Monitoring, Log Analysis

Operating Systems: Linux (Kali Linux), Windows

Scripting & Programming: Python, Bash, PowerShell, Java, SQL, JavaScript, React, HTML, CSS

Cloud & Identity: Microsoft Azure, AWS, IAM, Cloud Security Monitoring

Other Tools: Git, GitHub, MySQL, MongoDB

PROFESSIONAL EXPERIENCE

PricewaterhouseCoopers (PwC) - Risk Consulting & Advisory Aug - 2025 – Present

- VAPT:** Identified security weaknesses, vulnerabilities, and misconfigurations across enterprise environments through security monitoring, technical analysis, manual validation, and risk-based prioritization of findings.
- SOC Operations:** Performed SOC L1 monitoring, alert triage, log analysis, and initial incident investigation to identify suspicious activity, validate security alerts, and support escalation workflows.
- Security Architecture & Automation:** Supported SIEM migration projects and configured log collectors across **IBM QRadar, Palo Alto Cortex XSIAM and XDR, and Google SecOps / SOAR** improving centralized visibility, event correlation, and security monitoring capabilities.
- IS Audit:** Contributed to Information Systems Audit engagements by assessing IT controls, identifying control gaps, documenting risk ratings and findings, and supporting remediation planning.
- Cloud Security:** Identity and access management, RBAC, Azure Policy, Key Vault, Microsoft Defender for Cloud, network security, security monitoring, and cloud resource protection.

CERTIFICATIONS

• Certified Ethical Hacker (CEH)	<i>EC-Council</i>	July 2026
• Microsoft Certified: Security Operations Analyst Associate (SC-200)	<i>Microsoft</i>	June 2026
• Microsoft Certified: Azure Security Engineer Associate (AZ-500)	<i>Microsoft</i>	May 2026
• Claude Certified Architect / Developer	<i>Anthropic</i>	Sep 2026
• ISO/IEC 27701 - Privacy Information Management	<i>Intertek</i>	May 2026
• Digital Personal Data Protection (DPDP) Act	<i>PwC Internal Training</i>	June 2026

PROJECTS

PERSONAL VULNERABILITY ASSESSMENT & PENETRATION TESTING (VAPT)

Nmap | Burp Suite | OWASP ZAP | Nessus | Qualys | Wireshark | Kali Linux | DVWA

- Designed and maintained a self-hosted cybersecurity lab to simulate real-world network and web application security assessments.
- Conducted network reconnaissance and service enumeration using Nmap, identifying open ports, running services, and potential attack surfaces.

- Performed vulnerability assessments using Nessus/Qualys, analysing and prioritizing findings based on severity and potential security impact.
- Conducted web application security testing against DVWA, identifying vulnerabilities aligned with the OWASP Top 10 using Burp Suite and OWASP ZAP.
- Used Wireshark to capture and analyse network traffic and investigate simulated attack activity.

PERSONAL SIEM & SECURITY MONITORING LAB

Feb - 2026

Wazuh | Suricata | Wireshark | Kali Linux | Linux | Log Analysis

- Designed and implemented a centralized security monitoring environment using Wazuh for log collection, analysis, and security event monitoring.
- Configured Suricata as a network intrusion detection system to detect suspicious network activity and potential attack patterns.
- Integrated security logs and network alerts to correlate events across multiple sources and improve visibility into simulated security incidents.
- Investigated security alerts by analysing logs, network traffic, and intrusion detection events.

SMART ATTENDANCE SYSTEM (RFID)

May 2026

Python | Flask | SQL | Arduino | HTML | CSS | JS

- Designed and developed an RFID-based attendance management system to automate attendance tracking.
- Built a Spring Boot backend to process authentication requests and manage attendance records.
- Integrated RFID hardware with Arduino to capture authentication data and automate attendance logging.

PERSONAL FINANCE MANAGEMENT SYSTEM

February 2026

Java | Spring Boot | REST APIs | MySQL

- Developed a personal finance management platform for expense tracking, budget management, and savings-goal monitoring.
- Designed and implemented RESTful APIs using Spring Boot to manage financial transactions and application functionality.
- Developed a MySQL database to securely manage financial records and user data.

AI-POWERED RIDESHARE APPLICATION

November 2025

HTML | CSS | JavaScript | Firebase | Google Maps API

- Developed an employee-focused rideshare application to improve transportation coordination and ride-sharing efficiency.
- Integrated Firebase for real-time data synchronization and user coordination.
- Implemented Google Maps API for location services, route visualization, and ride-matching functionality.

EDUCATION

Bachelor of Engineering, Computer Science Engineering

2021 – 2025

Dhaanish Ahmed College of Engineering, Chennai | CGPA: 8.89/10

Academics: SSLC – 86.6 | HSC – 88.3

PROFESSIONAL STRENGTHS

- Analytical thinking, troubleshooting, and attention to detail in vulnerability investigation
- Clear technical documentation and report writing
- Client collaboration and cross-functional communication
- Fast, self-driven technical learning (3 certifications earned within 4 months)

LANGUAGES

Tamil, English, Kannada
